

Lesson Two: Cost of Maintenance and Repairs

As with a house, a vehicle requires regular maintenance and upkeep to keep the vehicle in good working order. However, every vehicle will need repairs eventually. This lesson will explore the cost of repairs.

Example 1

Brainstorm tasks that would be considered regular maintenance for a vehicle.

- checking the brakes
- oil change
- tire rotation
- tire change → regular tires to winter tires
- fluid check

Example 2

As a class, list at least three things that would be considered a major vehicle repair.

- Body work (repairs to the car body (external) due to a collision)
- Replacing or fixing the transmission
- Replacing the windshield
- Repairs to the engine
- Tune-up
