QUIZLET

Quizlet is an amazing online website students can use to study and further their learning of the current subject they are working on in class, it is free and all you have to do is search your topic and pick a set. Quizlet was founded by Andrew Sutherland in 2005 originally to help him do well on his french test, when the technique worked, he shared his idea and now quizlet is used to help students study using various games flash cards and tests. You create an account you can organize the sets you are currently

using, and make a folder for each class/subject you are taking. It is a great tool to make sure you have a full understanding of what we are learning and helps you prepare for any upcoming tests. I just recently discovered this website and it has helped me so much, i took my test feeling confident and prepared. I think more students should try out this website!

ADVANTAGES

- helps you feel prepared and confident going into a test
- offers creative and fun ways to study and further your learning
- keeps you organized and up to date with your work
- multiple sets for areas with in a topic

DISADVANTAGES

- students could use quizlet as a way to cheat doing homework (since there are easy answers on the site)
- although quizlet has information on many topics, more unique topics might not be found
- the information could be different from what your teacher has taught you/ put on the test
- students could get distracted by ads
