Self-Reflection

Describe how the artifact you selected shows your strengths & growth in specific core competencies. The prompt questions on the left - or other self-assessment activities you may have done - may guide your reflection process.

The DNA model, reflects on my strength in communication because it involved working with partners. I also had to communicate afterwards with my partners to explain some of the stuff that I had learned such as A-T vs C-G, but I also had to listen to my partners or the teacher when there was parts that I didn't quite understand. These hands on projects were very good for growing my communication competency because often there was stuff that I wouldn't get but my partners would so we would communicate about the activity that we were doing.
