

CLOUD PROJECT

By: Brynne B

Cloud #1

Details:

Type of cloud: Cumulus

Why: I think it's a Cumulus cloud because this cloud has a puffy top and a flat like bottom its also in a clump not in a line. It looks like the cloud is close to the ground to.

Time: 8:51 PM

Date: July 13th, 2018

Cloud #2

Details:

Type of cloud: Cirrus

Why: I think it's a Cirrus cloud because this cloud is higher than the mountain point and it's a very thin and wispy clouds. There was low winds as well.

Time: 4:39pm

Date: March 19th, 2019

Cloud #3

Details:

Type of cloud: Cumulus

Why: I think this is a Cumulus cloud because its low in the sky and its very sharp and white.

Resembles a cotton ball as well (puffy).

Time: 1:32pm

Date: March 15th, 2019
