

Core Competencies

What are Core Competencies?

Core Competencies are the foundation to the Big Ideas, Curricular Competencies, and Content of our BC Curriculum. This foundation ensures that students are always mindful of their growth in the Core Competencies through self-reflection, self-assessment, and providing evidence of growth.

Why Self-Assessment?

Students come to the classroom with experiences and knowledge related to the Core Competencies. Self-assessment allows students to develop the ability to describe their learning in relation to the Core Competencies. They will set goals and gain greater ownership for their learning when they have the opportunity to self-assess and describe who they are as learners, document their progress, and share their accomplishments in an ongoing and holistic manner. The emphasis on self-assessment promotes personalization, inclusion, diversity, and student ownership of learning as it becomes a natural part of the learning process.

Your Self-Assessment

Step 1 – Artifacts, Samples or Examples

Choose artifacts, samples and/or examples from your learning experiences this year that you feel illustrate your strengths & growth in one or more of the core competencies. This could include photos, collages, graphic stories, illustrations, poems, etc. If you have not done so already, place these artifacts in a new post on your Edublog. Look at the list of examples for documenting your learning provided below:
