

How Did your Collaboration go for this Project?

By: Maya Pawley

I thought overall the collaboration went well and all our group goals were met as a team. I would say the work load was all mainly equal; with Clement Ilja and I all finishing the Kahoot together, then I put the PowerPoint together writing two paragraphs. Later we added one from Ilja and one from Clement to the previously made PowerPoint. We worked well as a team because Clement and Ilja were able to teach me how to use Sway and Kahoot properly and also, I learned how to embed PowerPoints. With all of us working together we managed to finish the project with one day to practice and finish all the final details. We stayed in a reasonable timeline which let our goals be met and we were able to break the parts down into manageable pieces so no one had 90% of the project to do.
