

ICT Survey 11 Course Outline

Riverside Secondary

Mr. Jamieson

kjamieson@sd43.bc.ca

Welcome to ICT Modular Survey 11. You've made an excellent choice by deciding to take this course. Skills and proficiencies with technology are becoming more important in today's world and this course is designed to give you an introduction into various aspects of technology.

Course Description

ICT Modular Survey 11 will introduce the basic components of computer programming, photo manipulation and creating with Photoshop, learning web development with HTML and CSS, and developing basic skills in 3D modeling and animation. Students will learn to use a variety of skills throughout the duration of the course.

Students will be given the opportunity to work with multiple different programs and interfaces throughout the course as they continue to develop their skills and abilities.

Course Evaluation:

Each unit will entail a number of smaller, guided assignments in addition to a larger ongoing project. Students are encouraged to challenge themselves and to go ahead of the pace of the class as this will provide them with the most opportunity for learning.
