Plagiarism: Representing the words, ideas, research, or data created by, or belonging to, someone else as if it were your own. Plagiarism may range from close imitation or paraphrasing the thoughts of another, to the submission of an entire Academic Work created by someone else. All forms of plagiarism share a common element: material is being presented as the Student’s original Academic Work, without acknowledgement, use of quotation marks, citations, or other references deemed appropriate by College staff. Plagiarism also includes submitting the same work for credit in more than one course. Students who want to submit work that was prepared for another course must first receive instructor permission.
