Full-Stack Developer (Term)

Marketing and Web Presence

Applicants are to clearly demonstrate how they satisfy the selection criteria in their written submissions and must identify the competition number they are applying for in the subject line of the email. An eligibility list may be created for similar casual, part-time, full-time, and term positions.

DUTIES

Working with the Marketing and Web Presence team, the Full-Stack Developer (FSD) is responsible for maintaining and coding – from server-side management to front-end development – existing and new public-facing web properties for the College. Focusing on the user experience, the FSD will apply a user-centred design approach to building websites that is intuitive, accessible and seamless for all audiences. Additional work includes developing interactive web elements, innovative website features and working with data supplied from third-party APIs.

REQUIRED QUALIFICATIONS

• A degree or diploma in Computer Science or Web Development. An equivalent combination of education and experience may be considered
• Several years of front-end and back-end development experience
• Extensive working knowledge of HTML, CSS, JavaScript, PHP and MySQL.
• Demonstrable understanding of optimal uses of various web frameworks
• Significant experience developing WordPress custom themes, page templates, Gutenberg blocks and plugins
• Significant experience with using APIs from both online services and internally built applications to pull and update information
• Significant experience in web design to identify user experience pitfalls and come up with implementable solutions
• Familiarity with implementing WCAG 2.0 web accessibility guidelines
• Clear understanding of best practices for developing, testing, and debugging code, as well as continuous delivery techniques
• Values Diversity, Equity, and Inclusion
• Commitment to lifelong learning

ASSETS

• General understanding of Microsoft .NET frameworks
• Experience with modern JS frameworks
• A solid understanding of implementing and using various analytics packages to measure user engagement and server/application/website health
• Demonstrable understanding of server management for websites/apps
• Familiarity with cloud-based programs like Heroku and Amazon Web Services

CONDITIONS OF EMPLOYMENT

• Applicants must be legally entitled to work in Canada
• This position may be required to work evenings and/or weekends
• This position may be required to work overtime
• Applicants must have the ability to work from a home office, but also be available to attend meetings in person
